

PROTECT SHARKS

BY MOK CHEUK YING (6A)

Habitats

Sharks live everywhere. They mostly live in deep seas. So, it is dangerous to swim in the sea when a notice signal is on.

HOW DO THEY HUNT

THEY SWIM QUICK AND FAST, SO THEIR PREY CAN'T ESCAPE. THEN, THE SHARKS WILL CATCH THE PREY BY USING THEIR MOUTH, THEN SWIM AWAY TO ENJOY THEIR MEAL ALONE!

Traits

Because humans keep hunting them, sharks are afraid of humans. So when we try to hunt them, they will try to attack us because they thought we were trying to kill them.

THEIR BODY

SHARKS DON'T HAVE ANY BONES. THEIR BONES ARE MADE OF SOMETHING LIKE GOO.

What they eat

Actually sharks won't eat human if you don't mean to hurt them. They usually eat plenty of fish.

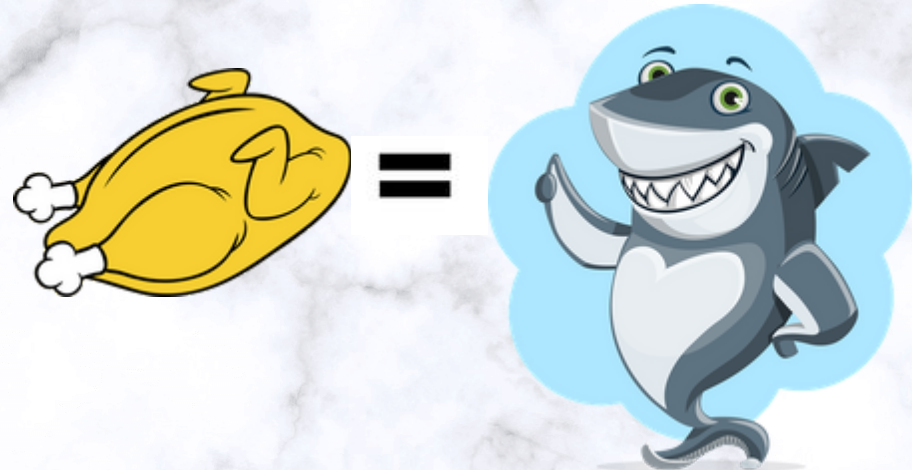

STOP EATING SHARK FINS! SHARKS ARE ALREADY IN DANGER!

EVERY SHARK HAS ONE FIN ONLY! THEY WILL LOSE THEIR LIVES WHEN THEIR FINS ARE CUT OUT. EVERY HOUR, THERE ARE 11,000 SHARKS KILLED BY FISHERMEN. SO EACH YEAR 100 MILLION SHARKS WERE KILLED! SO CRUEL!

SHARK FIN SOUP TASTES LIKE CHICKEN! SO, IF EVERYONE EATS CHICKEN, NOT SHARKS, SHARKS WON'T BE IN DANGER!

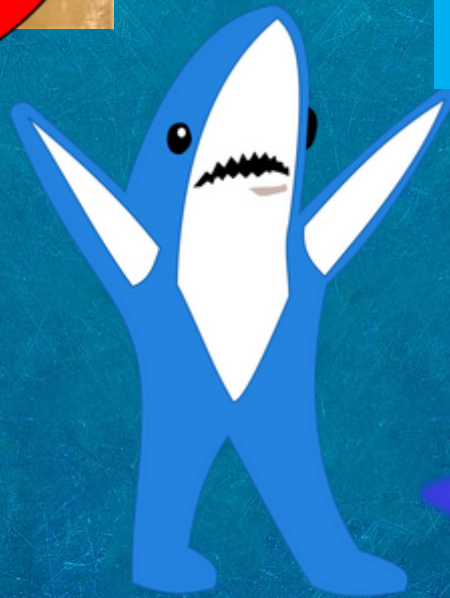

'SO EVERYONE, JUST EAT CHICKEN PLEASE!' SHARK SAID, FROWNING.

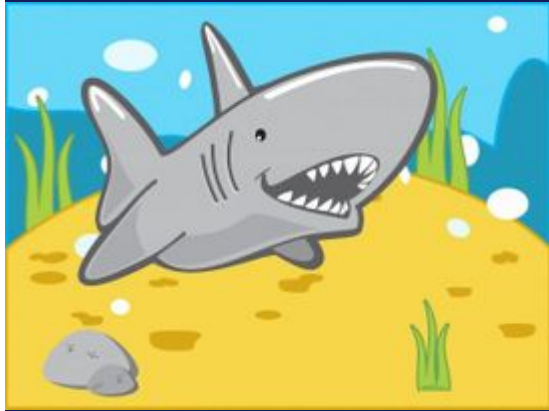

**HELP SHARKS! STOP EATING SHARK FINS
IN SOMEBODY'S WEDDING.
YOU CAN DO IT!**

**PLEASE LET ME GET
MY FIN BACK!**

'THANK
GOODNESS
HUMANS.
SEE YOU IN
THE
AQUARIUM.'
SHARK SAID
HAPPILY.

Sharks
will be
safe
because
of your
help!!!!!!!
