Jessie's dream  
job

## *Being a gardener*

My dream job is to be a gardener. They plant flowers and take care of them every day. I want to be a gardener because I like plants and animals. To be a good gardener we need to work hard and be patient. We need to be patient cause we need to wait for the flowers to grow. We have to look after the plants if we want to be a gardener too.

To be a gardener we need to remembering things such as what kind of plants is it call. They must work hard to plant flowers. First they need to make a hole through the mud, then they need to put the seed inside the hole, next they need to use some soiled to cover up the seed, at last, the gardeners have to water the plant. They need to look after the plants, so every morning they have to water the plants, and put it under the sun. But we do not just take after them in the morning, we also have to take care of them in the afternoon and in the evening, and we just take of them like how we take of them in the morning, but in the evening the sun is not in the sky, so we don't need to do that part.

Gardeners work very hard in the garden. They plant flowers and trees to make the air fresh and we will not often get sick. They also pick some of the flowers to the market and sell them, to make some money. I think the most useful subject for being a great gardener is General studies because we can learn how to plant and more about plants. Some gardeners plant fresh vegetables for us.

I think being a gardener is a great job, because plants can help to absorb carbon dioxide and make oxygen via the photosynthesis process, we should plant more plants to make the air fresh, so that everyone can breathe in the fresh air.

Even though being a Gardener is hard, but you will feel it is worth it because it can make the air fresh, and you will see everybody breathing *happily*.

What about you? What do you want to do when you grow up?
